Professional Summary

Python Full Stack Developer with an MCA and 7 months of professional experience at **Techsprout AI Labs**, contributing to production web and mobile applications. Skilled in **Python, PHP, Laravel 12, Django, Next.js, Flutter, MySQL, and REST APIs**, with hands-on experience in backend development, API integration, authentication, RBAC, payment workflows, and database-driven applications. Experienced in developing and maintaining recruitment and startup-focused platforms, implementing **technical SEO, third-party API integrations, responsive interfaces, deployment, and production debugging**. Strong understanding of full-stack application development and frontend-backend integration.

Experience

Software Developer Intern **Feb 2026 – Aug 2026**
Techsprout AI Labs Hyderabad

TeachNow – Recruitment Platform & Mobile Application **teachnow.in**

- Developed and enhanced recruitment platform features using **Laravel 12, Next.js, MySQL, Sanctum, and REST APIs**, supporting workflows for job seekers, employers, recruiters, and administrators.
- Implemented **authentication and role-based access control (RBAC)**, along with job posting, recruiter management, application tracking, dashboards, and subscription management.
- Developed backend APIs and database functionality using **Laravel Eloquent, MySQL, validation, and protected routes** to support frontend and mobile application workflows.
- Integrated **Razorpay payment processing and webhooks**, supporting payment-related API communication and subscription functionality between the application and payment gateway.
- Implemented **OpenAI-powered resume generation and job-matching features**, integrating AI APIs into the recruitment workflow.
- Developed and maintained features for the **Flutter mobile application** and supported Linux/VPS configuration, deployment activities, API troubleshooting, and production debugging.

StartupSaga – Startup & Business Platform **startupsaga.in**

- Developed and enhanced a **startup and business content platform** using **Next.js, React, TypeScript, Django, Django REST Framework, and MySQL/SQLite**.
- Implemented and maintained platform functionality for **startup directories, business stories, city ecosystems, categories, content submissions, newsletters, and dynamic CMS pages**.
- Developed and integrated **Django REST APIs** for content management, startup information, stories, submissions, navigation, dynamic pages, and frontend data retrieval.
- Integrated the **Next.js frontend with the Django REST backend**, handling API requests, response data, forms, content rendering, and frontend functionality.
- Implemented and maintained **technical SEO**, including dynamic metadata, canonical URLs, XML sitemaps, robots.txt, JSON-LD structured data, and SEO-friendly URL structures.
- Supported **website rehosting, deployment configuration, server setup, API troubleshooting, and production debugging**, maintaining existing application functionality during deployment changes.

Education

Master of Computer Applications (MCA) **Nov 2022 – Nov 2024**
University College of Science, Saifabad, Osmania University
CGPA: 8.0

Bachelor of Science (MPCS) **Oct 2019 – Aug 2022**
BJR Government Degree College, Osmania University
CGPA: 7.96

Technical Skills

Languages: Python, PHP, JavaScript
Frameworks: Laravel 12, Django, Next.js, Flutter
Frontend: HTML5, CSS3, Bootstrap, jQuery, Tailwind CSS
Backend & Database: REST APIs, MySQL, SQLite, Eloquent ORM, Laravel Sanctum
Integrations: Razorpay, Webhooks, OpenAI API
SEO: Meta Tags, Canonical URLs, XML Sitemap, robots.txt, JSON-LD
Tools & Deployment: Git, GitHub, Postman, VS Code, Linux, Hostinger VPS

Projects

AIS E-Bike Rental Platform

Tech Stack: Django, MySQL, Bootstrap

- Developed a role-based e-bike rental platform with dedicated workflows and dashboards for **Riders, Vehicle Providers, and Administrators**.
- Implemented authentication, vehicle management, booking workflows, wallet management, availability tracking, and role-specific platform functionality.
- Integrated Django with **MySQL** to manage users, vehicles, bookings, and rental-related data, with responsive Bootstrap-based interfaces.
